ASSOCIATION OF MIDWESTERN COLLEGE BIOLOGY TEACHERS  VOL. 6, #3  SEPTEMBER, 1980

IN MEMORIAM

JACK WILLARD SNYDER
March 12, 1928 — April 30, 1980

It is with deep regret that we report the death of a long-time member of AMCBT, Jack Snyder. Jack was elected as a Member-at-Large to the Steering Committee last year in Louisville, and had been a member of AMCBT since 1971. Jack was a Professor at Eureka College, where he had been a member of the faculty since 1965. He died while visiting in Ferrum, Virginia. He is survived by his wife, three daughters and four sons. All of us in AMCBT extend our deepest sympathy to his family. We will sorely miss his active, vigorous participation in AMCBT.

As if the above where not enough, this mailing of the program for the 24th Annual Meeting was delayed because of the death of two more AMCBT members, both at the same school, Iowa Central Community College. James Royce, of ICCC, and our program chairman informed that the delay in assembling the program was caused in part by the death of both W. G. Bennett, who was made an Honorary Life Member last year, and C. L. Christensen, both of ICCC. Details are not yet available to Bioscene, and will be run in the next issue. Again our deepest sympathy to the families of both AMCBT members.
